The College "Widow" given by the students of the St. Johns Stake Academy, under the direction of Mrs. Louise T. Sandin was a decided success in every particular. The parts were rendered by all in an excellent manner and showed marked talent and only needed such training as Mrs. Sandin gave them to bring out the best there was in them and those who heard the play all join in saying that it was the best for a long time. Just a word about that music, which was under the direction of Prof. J. Alfred Anderson, we believe that it is the best that St. Johns has ever had and as good as you will find in any town. A large crowd was in attendance, filling the hall to its full capacity thus showing their appreciation of the school and its undertakings.

The Best Recommendation.

The strongest recommendation any article may receive is a favorable word from the user. It is the recommendations of those who have used it that makes Chamberlain's Cough Remedy so popular. WHY PRINCE ALBERT WINS. Patented Process Is Responsible for Its International Popularity.

Smokers so much appreciate the flavor and coolness and aroma of Prince Albert pipe and cigarette tobacco that they often marvel that this one brand could be so different from all others.

The answer to this question is to be found on the reverse side of every Prince Albert package, where you will read: "Process Patented July 30th, 1907." That tells the whole story. Prince Albert is made by a patented process that cuts out the bite and parch, which makes the tobacco so mighty agreeable and satisfying to men of every taste of every civilized nation on the globe.

Smokers should realize that this patented process cost three years' continuous work and study and a fortune in money to perfect. But the result has proven to be worth all that was expended upon it because it has set free men who believe they never could enjoy a pipe or a makin's cigarette.

Prince Albert makes it possible for every man to smoke a pipe or to roll his own cigarette. And, no matter how tender the tongue Prince Albert cannot bite or parch. That is cut out by the patented process leaving for the smoker only the joys the fragrant tobacco.

It is a fact that since Prince Albert "arrived," just about six years ago; it has made three men smoke pipes where one smoked a pipe before!

A protest to the State Land Commissioner asking that he make a personal investigation of the conditions in this county before making large sales of States Lands to individuals or companies so that it would be impossible for companies or individuals to gain control of large areas of the public domain, was signed by the Board and their Clerk instructed to forward the same to the State Land Commissioner, W. A. Moeur, at Phoenix at once. This particular protest was referring to the Rio Puerco Valley particularity and giving conditions there.

Petitions having been filed with the clerk by E. W. Grimes and The St. Johns Irrigation Co. asking the Board to grant them a franchise to erect and maintain poles for the purpose of conveying and distributing electricity for light and power purposes in St. Johns, were considered by the Board. In view of the fact that there has been three previous franchises granted for this purpose by previous Boards, this Board ordered the Clerk to notify representatives of the other three companies to appear before the Board on Monday, March 6th, at 10 a. m. and there show cause why their franchise should not be cancelled. It was decided to hold the present petitions over until that date before any decision was made.

The Treasurer was ordered by the Board to make the following transfers: \$5,000.00 from the General County to the Salary Fund, and to transfer \$4,000.00 from the General County Fund to the Expense Fund.
